	Total:	138904,8		687

687 units of machineries to the sum of 138904.8 thousand US dollars of trade name «Komatsu» were being purchased in 2000-2007. Besides, according the contract «BHT-062 from 02.12.2014 ten units of excavators of trade name “Komatsu” PC200-8 with standard jib and five units PC220LC-8 with oblong jib and 25 units of bulldozers of trade name «Komatsu» D85EX-15R to the sum 38726450,00 manat have been purchased. Purchasing techniques of trade name «Komatsu» is used on construction of all objects of water management. Excavators and bulldozers of trade name «Komatsu» have started to work on construction of the Turkmen Lake “Altyn asyr”. In intense period of construction of the given object all machineries worked in 2-3 shifts, exceeding all established quotas and volumes of earth excavation (m^3). Besides, mechanisms of trade name «Komatsu» are operating in clearing of stream canal of the Karakumderya river, Turkmenderya river, shore protection of Amu Darya river, on clearing of intraeconomic and intereconomic collectors, on construction of new supply channels (collectors) and reservoirs. The techniques of trade name «Komatsu» has proved to be productive and reliable technique.

Machineries of trade name «Komatsu» are served by the service-dealer «Guneykaya Sanayi ve Ticaret A.Ş.» of «Komatsu Ltd» company. During the guarantee period the service-dealer serviced in proper time, debugged and helps to support operating condition of “Komatsu” techniques. Under demands of construction divisions of the ministry the service-dealer is executing work on fulfillment of major repairs of aggregates and technicians as a whole. The necessary quantity of filters, oils and spare details were got at the service-dealer.

Educational Centre of Komatsu

For maintenance of operating condition of mechanisms at the necessary level and productive work of mechanisms it is necessary training of operators. Education are spent in educational centre "Komatsu" of the service-dealer «Guneykaya Sanayi ve Ticaret A.S.H» «Komatsu Ltd» company. For acquaintance by technical characteristics, skills of driving of technique, and also the general devices of mechanisms of trade name «Komatsu» special training courses were held for machine operators in educational centre and issue certificates. Responsible mechanics of divisions of the ministry received training for long-term operation and reliable use of mechanisms, qualitative service. Experts of the central offices were involved for training of mechanics in educational centre "Komatsu". All conducted actions, training have yielded the positive results on operation of mechanisms As a result techniques of trade name «Komatsu» has proved to be productive in construction and fulfillment of all intended plans of water-related workers for long years.

Training of Mechanics

In programs of development of the Water economy of Turkmenistan for 2013-2030 and increasing of capacity of Karakumdera for 2015-2020 it is provided purchase.

The ministry of Agriculture and water economy of Turkmenistan considers the company «Itochu Corporation» Japan as the reliable partner and further is ready to co-operate on delivery of machineries of trade name «Komatsu» and spare details under the mutually advantageous condition.

Also the ministry of Agriculture and water economy of Turkmenistan is ready to co-operate with the Japanese companies on delivery of construction machineries and in other sectors of water related construction. We are ready to talk over your proposals on mutual cooperation.

Thank you for attention.
